I just bought a brand new multi-effects unit for my guitar, "Blue Steel". It's the Zoom 505 II , and it was only \$99 (+ \$20 for a power adapter so I don't burn through batteries) from Billy Hyde Music at Paramatta.
I don't mind plugging them, they did me a good deal, and the guy even let me try it out with a similar guitar to my own, so I could make a really informed decision. You shall have to come by and check out what this thing can do!
